

OTTAWA-GATINEAU 2002 CBC RESULTS

The Ottawa-Gatineau CBC was held on the 15 December 2002. There were 129 observers in the field and 11 feeder watchers. The weather was overcast in the morning and rain/snow in the afternoon. The cold snap earlier in the month most likely reduced the number of species seen.

Seventy-three species were found, 8 Record Highs, and 5 Record Ties. No new species located this year. The meal at the compilation session, hosted by Club des ornithologues de l'Outaouais, completed a great birding day.

- High is noted in **RED** in the "Species Column" and ****** in "Total Column".
- Tie Record High is noted in **BLUE** in the "Species Column" and ***** in "Total Column".
- Hybrid is noted in ()'s in the "Total Column" and not included in the "Total Count".
- The "Total Column" takes into consideration overlap. These are indicated by [].
