

## OTTAWA-GATINEAU 2006 CBC RESULTS

### 87th Year

The Ottawa-Gatineau CBC was held on 17th of December 2006. This year, the weather was unusual warm. There was no snow, in fact the grass was greener than it was in the summer and the temperature ran between 5 and 10 degrees. It was mainly overcast with a few sunny breaks in the afternoon.

There were 108 field observers and 23 feeder watchers. Eighty two species (82) were found, 12 Record Highs, and 2 New Species were seen this year as well as 4 high record ties. The total individual birds seen was 41.939, which is not as high as last year but the American Crow still came as the most common bird seen, making up about 32% of the total. This does not take into account the possible overlaps.

The meal at the compilation session, hosted by Club des ornithologue de l'Outaouais, completed a great birding day.

High Record is noted in **RED** in the "Species Column" and in the "Total Column".

Tie Record High is noted in **BLUE** in the "Species Column" and in the "Total Column".

New Species is noted in **GREEN** in the "Species Column" and in the "Total Column".

- Hybrids and Unknown Species are noted in ( )'s in the "Total Column" and are not included in the "Total Count".
- The "Total Column" takes into consideration overlap. These are indicated by [ ]

SPECIES	Hull	Aylmer	Gatineau	Britannia	Ottawa	Gloucester	Total
<b>Cackling Goose / Bernache de Hutchins</b>	0	0	0	1	0	0	<b>1</b>
