

# Visual and Sound Wildlife Quests at the Fletcher Wildlife Garden Late summer version

**FWG, a project of the Ottawa Field-Naturalists' Club, maintains an urban area provided by Agriculture and Agri-foods Canada. The volunteers work to create natural regions to promote habitats suitable for native wildlife including animals, insects, plants, trees, and fungi. Use this flyer to help identify and discover some of the resident wildlife. Find flyers for summer and fall at our website: [ofnc.ca/quests](http://ofnc.ca/quests)**
